CATALOG

WINTER

Just when you started wondering if you would ever again find new and better software for your Atari, Antic, in collaboration with the most diverse developers, brings you award-winning software.

What's more, in the last four years Antic has built a fine reputation by selling direct, cutting costs and passing the savings on to you!

Now... get ready to discover everything you've been looking for in the exciting world of telecommunications, professional tools, strategy and simulation software. All brought to you by Antic.

© 1987 Atari Inc. Atari and the Atari logo are trademarks of Atari Corp.

Dear Valued Customer:

When the Atari computer first made its debut, Antic Publishing was there to provide timely news and information in an exciting industry giving birth to a new way of life for Atari users.

Much has happened since that first day. Antic is the industry's leading Atari publisher. Our secret? Simple. Since the delivery of our first magazine, we have provided useful applications, entertainment, information, quality, and value directly to our customers.

And we're still doing that today. Publishing and delivering new and innovative software when the stores are facing a glut of old and high priced products.

We've cut costly mark-ups! When you buy Antic software, you can depend on quality and value at a price in keeping with your needs.

What's more, Antic will release new titles every three months.

This catalog is full of new and exciting software. Over 35 of the APX Classics are brand new titles, hand-picked from the offerings of today's most talented Atari programmers. Let the following pages show you new ways to use your Atari. Ways you may never even have thought about.

- **GRAPHICS**—turn your Atari into a design studio. Don't miss this season's RAMbrandt and Graphic Shop on pages 7 and 8.
- **TELECOMMUNICATIONS**—be a powerful communicator with Bulletin Board Construction Set and BackTalk on pages 14 and 15.
- **PRO-LINE**—features the new Earth Views, Space Base, HomeCard, and Lifespan.
- **APX CLASSICS**—the wellspring of the new, and the most popular of the old—best titles in every category.
- **ANTIC BOOKSTORE and PUBLIC DOMAIN SOFTWARE LIBRARY**—where your imagination is the only limit.
- **ANTIC ARCHIVES**—our own back issues—on disk. Plus, an entire library of classic magazine volumes.

As always, Antic takes care of every detail! Our software representatives are ready to help you choose the products that are right for you.

We will continue to make Antic the best source for Atari. You can count on us. Our products and customer satisfaction carry the Antic guarantee. We're only a toll-free call away!

Antic is proud to deliver the best of Atari.

Yours truly,

G.S. Yost

**Marketing Director
Antic Publishing, Inc.**

P.S. Learn more about our Antic customer feedback line on Compuserve. See details in the Customer Service note on next page. We look forward to hearing from you!

UPGRADE POLICY

All Antic APX Classics programs are backed by an excellent upgrade policy. Just send in your current original program disk with proof of purchase and specify the revision you want.

We will copy the new version directly onto the original disk. Please include a \$5.00 upgrade and handling fee and send it to Antic Catalog Upgrades—Customer Service Department.

UNCONDITIONAL GUARANTEE OF COMPLETE SATISFACTION

We unconditionally guarantee every product we sell to be free of defects and to operate properly. If you are not completely satisfied, or if any item is defective, just contact our customer service department by mail, or phone, within 30 days of receipt of merchandise to arrange for a prompt replacement. Only returns in new condition, with the original packaging materials will be accepted.

OUR JOB IS TO HELP YOU!

ANTIC CUSTOMER SERVICE TEAM

Meet the Antic Customer Service Team. Headed by Lisa Wehrer, they have 20 years combined experience in computer science, customer service, order processing and shipping.

All product distribution is coordinated by Lisa. Thanks to her double-key, zip code system, each order receives a batch and individual number, which allows every order inquiry to be handled with personal attention. Lisa's 10 years as a customer service specialist provide you with the personal attention you deserve.

Here's how it works. You call toll free or mail in your order. Helpful telephone operators are available at your convenience 24 hours-a-day. Our customer service representative takes that information and enters it into our central databank. The following work day, Lisa's team processes your credit card or check and gives your order its own personal batch number. Then your order is telecommunicated via Atari telex to our central shipping location. There, each order is individually packed, logged, and shipped to you by first-class mail.

If we happen to be out of stock of an extremely popular program, a customer service rep will call you and tell you the status of your order—before you get concerned about it. When you receive your order, you may have a question or just want to call and let us know how happy you are with the service and products. But, say you have a technical question. Ask for the product specialist. Or, you have a question about the package you have received. Ask for a customer service rep and refer to your zip code and batch number on the packing slip. To assure the best customer service possible, please don't call the 800 number. This is for orders only. Compuserve members can take advantage of ANTIC ONLINE and leave a message that will be answered within two working days. Or, just log on and scan New Products for updates about the latest Catalog—sometimes even before it hits the streets! Just type GO ANTIC, select number 1 from the ANTIC ONLINE main menu and select Catalog Customer Service from the Antic Central menu.

It's a simple worry free process.

- To order, call toll free 800-443-0100 or write to Antic, 524 Second St., San Francisco, CA 94107.
- Customer Service inquiries call (415) 957-0886. (Please don't call our 800 number)
- Compuserve members log on to ANTIC ONLINE.
- Customer satisfaction and products carry the Antic Guarantee.

Everything you need to know about ordering from the Antic Software catalog is right on this page.

We want to hear from you today!

PRODUCT WARRANTY

Antic Publishing, Inc. warrants the disks sold in this catalog for one year against failure due to ordinary wear and tear or faulty manufacture. Should you require warranty service, assistance or information, contact Antic Customer Service.

Antic Publishing
524 Second St.
San Francisco, Ca. 94107
(415) 957-0886

NOTE: You must send your warranty card to Antic to be covered by this warranty. If we have your card on file, you may return your original disk to us for evaluation and replacement.

NEW!
FIRST 520ST
PROGRAM

Antic ST Research & Development Presents:

C.O.L.R. OBJECT EDITOR

520 ST Color Oriented Low Resolution Object Editor
Written in C and assembly language

by The Rugby Circle

Written by professional, first-line ST developers for in-house design of ST Joust. C.O.L.R. OBJECT EDITOR will automate the design process of bit-mapped graphics images *and* transfer them to usable byte-array format. Sample source and object code animation routines are included. Save tremendous time and work. GEM interface gets you up-and-running right away.

ST RAM is divided into Mural space (full-screen 320×200) and Edit space (80×40 chunk). Grab any piece of your Mural with the edit drag box and it will *instantly* copy to the Edit screen. Flip to your Edit screen and the 80×40 chunk now fills 90 percent of the display (FatBits mode). Draw with the mouse *or* use the cursor keys for fine detail. Keep your bearings. Handy X-Y coordinates always on-screen. Create drag boxes to manipulate *part* or *all* of your images. Invert and twist objects, copy objects, and wipe drag boxes with any color. Preview final image size at *all times* in the Object Display Window.

"An all-purpose graphic design utility package for ST program designers using the 16-color mode."

Brilliant 16-color palettes are modified and stored in *separate* files for greater flexibility. Modify palettes with the R,G,B keys—RGB numeric values are displayed for easy reference. Up to four palettes may be stored in **RAM** and accessed *immediately* with the Function keys.

Mural mode has the unique ability to act as a temporary storage area for 20 Edit screens. Simple PUT and GET commands between Edit and Mural modes let you *work on multiple objects at once* without accessing the disk drive.

Just point and click the mouse to use your objects and designs. C.O.L.R. OBJECT EDITOR will then write a data file to disk in string array format. Generates source code *essential* for designing "software sprites"—the closest thing to player/missiles the 520ST has. An example is provided (in C) that will demonstrate how to move your objects around the screen for game animation. Also useful for creating detailed landscapes. Byte-arrays can be manipulated from other languages, such as assembler, Forth and BASIC. Mural file formats are compatible with other popular ST paint programs.

HomeCard

by Sparky Starks and Russ Wetmore

"Maintain *all* those lists—by the author of HomePak"

Keep your personal lists in order. Christmas lists, mailing lists, Rolodex® lists, personnel files and telephone files aren't a bother anymore! HomeCard is a speedy, full-featured, electronic index card filing system. HomeCard is a label and list management tool with advanced printer formatting. Create *your own* label formats—Rolodex, one-up labels, customized letters (with HomeText), envelopes, cheshire labels, columnar reports, etc. Use HomeCard to create lists and keep them up-to-date. Make changes easily—full-screen editing with popular word-processing commands. Add and delete names, addresses, phone numbers. Store 234 cards on each disk, divided into up to 8 major categories. Chain any number of cards together for reference & print-out. Autodial phone numbers with Atari 1030, or Hayes-compatible modems. . . or with tones generated by TV speaker. Use in home, school, office tool

Editors Note: HomeCard is a quality information management tool which has been uniquely designed for use by all microcomputer users, regardless of their level of computer literacy. If you are working with a computer for the first time, you'll appreciate how easy it is to use HomeCard. If you are a more advanced user, you will find that, underneath its simplicity, HomeCard offers very sophisticated features never implemented before on an 8-bit computer. Anyone who wants to store information for future use will want to look closely at HomeCard.

REQUIRES: 48K RAM

OPTIONAL: Printer, Atari 1030 or Hayes-compatible modem

LIFESPAN is an Admacadium production.

TRAVEL TO THE STARS!

"Feed your imagination a banquet!"

Get an understanding of the important scientific facts, terms and theories of today. Use EARTH VIEWS and SPACE BASE to study: Geography, Astronomy, Cartography, Spaceflight tracking, Physics, History and Science. For education. For fun.

"Perfect for Geography, Science, HAM Radio, History & Current Events"

EARTH VIEWS

by R.G. Wilson

Written in machine language

EARTH VIEWS is a WORLD ATLAS!—An electronic world GLOBE!—An exciting adventure game! Yes, it's all 3 in 1: An ATLAS, a GLOBE, a GAME! Call up 250,000 different maps & views of the earth **Instantly** at the touch of a button! Includes detailed hi-res maps & projections linked to a giant "Gazeteer Of WORLD PLACENAMES".

In the "GAME" Section: You fly into the Bermuda triangle—Go on quests to exotic places—On your search for Fame, Fortune & Happiness! A built-in HELP feature guides you.

Detailed screen displays of longitude & latitude, lots of colorful information.

REQUIRES: 48K RAM, One Joystick

#AP141 \$19.95

EDITORS NOTE: This pair of programs lets you perform **elaborate visual representations** of the Earth, its environs and its heavenly bodies—Along with the data needed for study—Well presented. Complete with documentation that is clear and detailed. Get plotting speed, screen detail and motion formerly only possible with mini and mainframe computers. Extremely well programmed—Lots of applications, particularly in education. Science departments love them!

Rotating Globe
(Orthographic Projection)

Cylindrical Projection with

"Makes Science Fascinating!"

SPACE BASE

by Jeff Mehlman

Written in machine language

SPACE BASE is a computer-referenced SKY ATLAS—SPACE BASE is a STELLAR INFORMATION DATA BASE—SPACE BASE is a complete, instant ASTRONOMY REFERENCE SOURCE! SPACE BASE is **All Three! In ONE PROGRAM!** Features include: Cursor movement over giant scrolling color star map (larger than any other scrolling map). Get star data: Name, R.A., DEC, distance from Earth, parallax, radial velocity, magnitudes, spectral type, color index, and more! Colorful screen chart shows where each star fits into the Hertzsprung-Russell Diagram. Study deep sky objects: diffuse nebulae, planetary nebulae, open clusters, globular clusters, many types of galaxies. Border of screen is the "color" of that star! A **must** if you own a telescope. A valuable addition to your library of learning software.

REQUIRES: 48K RAM, One Joystick

#AP142 \$19.95

Messier Catalog Star Data

Scrolling Star Map

Hertzsprung-Russell Diagram

Create Print Shop Icon graphics from all or part of your favorite Microwillustrator or Micropainter graphics files.

GRAPHIC SHOP

by Charles Jackson and Darryl May

Written in compiled BASIC

Now you can use the best graphics editing software to create signs, banners and decorative icons for the best graphics printing program. If you've enjoyed the fabulous, friendly Print Shop from Broderbund, you may have been a little frustrated by the limitations of its graphics editor. Wouldn't you like to **harness the power and handling ease** of your Koala Pad or Touch Tablet to create those nifty letterheads? **Now it's a snap with GRAPHIC SHOP!** GRAPHIC SHOP uses a menu system and commands similar to Print Shop.

Choose to either **compress an entire picture** into a Print Shop file **or** pick up and **convert only a small portion of it**. Printer **Preview Screen** uses four windows to let you choose which color registers will be replaced by pattern fills, and which will appear as black and white. GRAPHIC SHOP was designed by the Antic staff to be elegant and simple to use.

OPTIONAL: RAMbrandt (AP157)

AP156 \$19.95

"Could be the closest look anyone's going to get of Halley's Comet. . ."

HALLEY PATROL

by Jeff Mehlman

Written in machine language

Atari owners are extra-lucky this year! This **Interactive graphic almanac** will take all the frustration out of discovering when and where to find Comet Halley. Detail and clarity are what the Atari can display so well, and the author of Space Base has done it again! **HALLEY PATROL animates** the comet in the same nine-foot by three-foot star map **with** a simultaneous information almanac. Key in any date for quick reference, or use the joystick or function keys to cruise through the animated seven-month period of viewing opportunity. Watch the comet grow from a speck and become visible in November. Labeled constellations smoothly scroll by as it turns into a blazing giant in late March, obscuring a section of the Milky Way. Visually **track the angle of the tail** in relation to the constellations as it continually shifts position. For **serious astronomers**, the almanac window displays fifteen fields which access its huge file of

comet data. Get the Right Ascension, Declination, Jovian date, 4 types of distances and velocities, Magnitude, and much more! Information bar gives novices **clear advice** about visibility conditions, full moons and solar flares, etc. Excellent documentation. The whole family will love this!

AP159 \$17.95

FREE BONUS DISK! Order **now** and we'll send you **HALLEY WATCH**, an educational microscreen astronomy class. Using Antic's elegant Fader slideshow, the author has developed an accurate course in Comet Halley's history, its physical structure, and point-of-view treetop tracking. Written for anyone to understand, you'll discover where to look for the comet at its closest passes to the Earth. Editors note: [Jeff Mehlman has requested that we make **HALLEY WATCH** a **FREE** contribution in accordance with the credo of The International Halley Watch.]

RAMbrandt

ATARI DESIGN STUDIO

by Bard Ermentrout of PACE

Written in FORTH and machine language

Imagine . . . the ultimate, all-in-one paint software. For under \$20! Sit down with RAMbrandt and enter a graphic design studio with the tools to make any programmer a creative artist. When we first saw this at Antic, it took our technical staff **three hours** to step through each of its features. Use the built-in programmers toolkit to enhance your own programs or picture files. Or just doodle with RAMbrandt for the fun of it! We barely have enough room to list all the **power**, but here goes:

- 5 graphics modes (7, 7+ (ANTIC E), and GTIA 9, 10, 11)
- Works with joystick, Koala Pad or Atari Touch Tablet; or **both** joystick and graphics tablet
- All functions execute **faster than any other paint program**
- Commands are screen selectable with on-screen mode window
- Horizontal and vertical coordinates always displayed
- Box mode
- Circle/ellipse mode
- Rubber band line mode
- Freehand plot mode
- Text mode (print in 4 sizes with **any font**—3 included)
- Paint or fill with any font
- Undo. A super-safety feature.
- Color hunt mode (paint over only the color you select)
- Random/Probability color and Exclusive Or color
- Transparent color (allows Quilt overlays)
- Window mode—grab any or all of your image and:
 - Rotate in 5 degree increments up to 360 degrees
 - Vertically or horizontally flip
 - Wipe with any color
 - Animate
- Animation mode (capture up to 32 frames and flip thru them at any speed—preview Moviemaker ideas instantly)
- Rubber stamp mode (multiple rubber stamps can pick up pieces of your pictures and duplicate them wherever you want)
- Fill mode (pattern, solid and random—define patterns yourself and store them on disk)
- Mirror mode (vertical, horizontal, and 4-way)
- Zoom mode
- User-definable unlimited brushes (5 predefined brushed built-in)
- Airbrush and Thick paint modes
- Paint or fill with any pattern, quilt or tile
- Quilts (selectable/definable two-color patterns which can be stored on disk—5 built-in)
- Tiles (selectable/definable patterns with any number of colors which can be stored on disk—5 built-in)
- Checked/Mix, horizontal or vertical striped patterns
- 128 colors on-screen at once in any mode with easy one-key access to Display List Interrupts. Works in all modes.
- Scale mode (select any size area and reduce it or blow it up)
- Mosaic RAMdisk support (flip from screen to screen)
- **Future** versions will support 130XE and Axlon RAMdisk.
- Printer module supports fast or slow screen dumps to Epson MX80-compatibles and C.I.TOH/NEC printers
- Okimate 10 color printer dump supports color fine-tuning
- Flip images backwards for T-shirt iron-on's!
- Save and Load pictures in formats compatible with Moviemaker, Micro-Illustrator, and Micropainter
- Complete documentation (includes info about file formats)

REQUIRES: 48K RAM, One joystick and/or Koala Pad or Touch Tablet

OPTIONAL: Okimate 10, Epson MX80-compatible, C.I.TOH or NEC printer. Mosaic RAMdisk.

APX CLASSICS from ANTIC

XE, XL COMPATIBLE

APX lives again... via Antic!

The Atari Program Exchange was one of the most advanced software distribution concepts ever created for personal computers (IBM came out with something very similar for the PC in 1984). APX published the best software submitted by Atari users from all over the world. These programs were outstanding—but considered too specialized in appeal for Atari's mass merchandising channels.

APX software was packaged simply but tastefully and sold mostly through well-written catalogs. With the reorganization of the Atari company and the shutdown of APX operations, Antic arranged directly with the authors to re-release many of the very best APX programs—games, real world applications, powerful utilities, demonstrations and tutorials.

APX Classics from ANTIC brings back the *finest* programs that had been unavailable to Atari users for many months. And you can count on being able to find what you're looking for at *half* Atari's former prices.

But you'll also notice that many of these programs have never been published anywhere before . . .

We are including this brand-new software with our top-of-the-line APX Classics because we want you to know they are as good as the best of APX. (Also, a lot are the latest works of former APX star programmers.) Watch for new product introductions every two months. If you have written an *outstanding* program, send it in for our Catalog Manager to evaluate. We pay competitive royalties.

All software available on disk only.

Each program disk is self-documented. Antic is in no manner associated with the Atari Program Exchange. Atari is a trademark of the Atari Corp. Antic is an independent periodical not affiliated in any way with Atari Corp.

"Feature-packed Word processing! A business plus!"

WORD MAGIC—NEW!

by Blue Collar Software version 4.0
Written in machine language
WORD MAGIC is the high-powered, low-priced word processor program for you! It's got *every major feature* you'll demand, plus all the *special* ones you'll love. "On-line help files" get you started. Choose from many type fonts. "Cut and paste" between files, then check your work with automatic, on-screen formatting. WORD MAGIC keeps you in control; use a joystick or trackball to quickly move the cursor—Scan files rapidly!

EDITOR'S NOTE: If you own the compatible Antic DATA MANAGER XL (AP129), you can easily perform professional mail-merge list processing and form letter operations. Or use WORD MAGIC with *built-in* GRAPHIC MAGIC plus an Epson or Gemini printer—Easily and professionally insert any graphic into any document. Then preview, paginate and print it out automatically! (This pair is functionally similar to the Macintosh and Image-Writer graphics/text combos.) See FREE BONUS below!

OPTIONAL: One Joystick or Trackball Controller

***AP130 \$19.95**

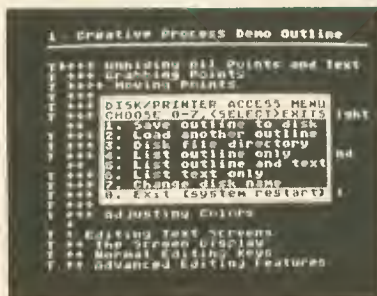

130XE version: Includes Word Magic, Graphic Magic and Spell Magic:

***AP160 \$29.95**

"GRAPHIC MAGIC is a FREE BONUS when you buy WORD MAGIC!"

GRAPHIC MAGIC

by Blue Collar Software
Combine graphics with your text!
Written in machine language
Here's a software program that is really magical! Combine illustrations & graphics with written presentations. Use it together with WORD MAGIC, plus an Epson or Gemini printer. Enhance your text with graphs, drawings, sketches & charts. Use illustrations you've generated with Micropainter, MicroIllustrator, B/Graph, or Graphics Mode 8. Functionally similar to the Macintosh & Imagewriter combination of text and graphics. Thousands of uses!

Creative Process

NEW!

Organize ideas with this thinktank outline processor for the Atari.

CREATIVE PROCESS

by Dave Thorson

Written in machine language

Capture your ideas and turn them into professional documents. *Control your own schedule* and juggle many projects at once. CREATIVE PROCESS can be your desktop manager, a drafting tool for making sense out of long meetings, an outline processor, address and phone number filer, project manager, calendar, time-record manager, and work-in-progress monitor. Reduce the time needed to get out a document because *speed is the key feature*. GEM-like command windows let you concentrate on *ideas*. It's as easy as jotting down a note. Advanced editing features include *WindowCopy*—user-defined windows that move or copy text anywhere. Undo key, adjustable screen colors, utilities package, and 130 XE RAM-disk support are only a few of CREATIVE PROCESS's *huge* list of features. Comes pre-configured for single and enhanced density—capable of supporting your double-density DOS's as well. 100% compatible with Word Magic (AP130), Atariwriter, and Paperclip.

REQUIRES: 48K RAM

OPTIONAL: Atari-compatible printer, Word Magic (AP130)

***AP151 \$19.95**

NEW!

"The first integrated, expandable dictionary for the Atari!"

SPELL MAGIC™

by Blue Collar Software

Written in machine language

Spell it *right—every time*, with this 34,000-word integrated dictionary. Get started fast with on-line help and simple menus. Install SPELL MAGIC and WORD MAGIC together on one disk. *Also*—check documents created by other word processors such as Paperclip and HomePak. Check in context: SPELL MAGIC *always* displays your document in a window on the upper half of your screen. Add an unlimited number of expandable *personal dictionaries* (up to 10,000 words each). Updates your personal dictionary automatically while checking words. Counts words. Works with single or double drive systems.

***AP144 \$19.95**

"Finally, a flexible, full-featured database."

DATA MANAGER XL

by William Bartlett

Written in BASIC and machine language

Here's a flexible, integrated data base manager/mini-word processor that's easy-to-use. Highly flexible features include: color-coded files, program handles up to 100 field (indexable categories), each field as large as 120 characters,—Quickly make changes with easy add and delete options. Print custom reports from existing files. An Index Manager function allows sorting and file rebuilding. Use with compatible AtariWriter and/or Antic's WORD MAGIC (AP130) for mail merge, form letters, or other letter/list processing needs! A special "Tools Manager" section features: database diagnostics & utilities plus a disk drive speed checker! How-to instructions are complete & detailed.

REQUIRES: Atari BASIC

PRINTER DRIVER CONSTRUCTION SET— For AtariWriter

by John Eric Hinckley

Written in machine language

Build your own printer drivers for AtariWriter! Now AtariWriter is totally compatible with every printer. Comes with 12 preconfigured drivers on disk, including: Epson FX-80/MX-80, Gemini 10X, NEC 8023, C.Itoh Pro-writer, Atari 1027, and Brother HR-25. Get improved utility from AtariWriter and your printer! Finally, you get all the features you need with your printer: Elongated text, centering, up to 3 different type fonts, proportional spacing, underlining, superscript, subscripts, and blocked right text. Includes demo file to show what functions are seen by your printer and special control-code prompts for quick one-time configuring of your custom printer driver.

REQUIRES: AtariWriter cartridge, any Atari-compatible printer.

#AP131 \$19.95

"Minicomputer power—now your documents can look like the pro's."

THE PRINT TOOL

by Marshall D. Abrams Ph.D.

Written in machine language

Control exactly how you want text laid out on a printed page or on a screen. THE PRINT TOOL is an Atari conversion of RUNOFF: the document formatter/compiler previously available only on DEC PDP-11's and VAX's. Automatically generate a table of contents, footnotes and index. Make slides for audiovisual presentations. Automatic section, chapter, appendix and page numbering. Use it for any size document—it outputs word plus line count. And much more! Compatible with every text editor/word processor. Students use THE PRINT TOOL for thesis formatting. Teachers use it for class materials—the same source can be used for slides and outlines. Plus, more professional programmers use it for documentation than *any other* text formatter.

REQUIRES: Any text editor (such as WORD MAGIC/AP130)

#AP148 \$19.95

"For Business, Fine arts, Engineering, computing!"

SCREEN PLOT

by Robert Wilson and

Michael Reichmann

Written in compiled BASIC and machine language

Now you can easily transfer color Atari screen graphics to paper. Supports Atari 1020 color plotter, Radio Shack CGP-115, Mannesmann Tally Pixy 3, Sweet Pea color plotters. Plot in different sizes; modify aspect/display ratios; display pictures & preview pen colors on screen. Special "super-impose" option stacks one plot on top of another. Generate drawings on screen with B/Graph, MicroIllustrator, Atari Artist, Atari Graphics, Atari Paint, Atari World or MicroPainter. Then print them out in color! It's easy with SCREEN PLOT! Includes source code to teach how plotter drivers are written.

REQUIRES: One of the above-listed plotters.

#AP135 \$12.95

GET-ORGANIZED SERIES

THE HOME INVENTORY

by Erv Friedman

Written in BASIC and machine language

Keep track of all the items in your home! Now, you can have a list indexed by: item type/location/value/or other custom categories. Calculate & Print out depreciation figures: monthly, yearly, plus totals & current values. Get both "straight-line" and "single item" depreciation figures for your taxes. Menu-driven system makes entries & catalog changes easy! Aids financial planning/accounting/insurance tasks. Large database stores up to 500 items per disk for fingertip access! **PROTECT YOURSELF!** Record your belongings!

REQUIRES: Atari BASIC

#AP127 \$19.95

The Roster

Makes Keeping track of names and addresses a snap!

Programmer's Library

"One of the best-designed animation packages, ever."

CARTOONIST

by Bryan Talbot
Written in BASIC and machine language

Generate exciting moving graphics with your Atari computer! Do fancy animation quickly! Easily create moving, animated displays of people, objects, or creatures you imagine. They'll walk, slither, hop and fly across the screen! Create a computer "movie" of still frames YOU design—(Use your joystick). Then play still frames back at speeds of up to 200 per second—Get GREAT animation! Save your "movies" on disk for later use or in BASIC programs. Written to allow quick & easy changes and for great results! Menu-driven and joystick-based, so kids love it.

REQUIRES: Atari BASIC. One joystick

OPTIONAL: One set of paddle controllers

#AP124 \$19.95

Cartoonist

Mapware

MAPWARE

by Harry Koons and Art Prag
Written in BASIC

Create high-resolution world maps. Store your maps for later use! Ideal for History, Geography, Cartography, Geology, amateur radio, spaceflight tracking, etc. For schools. For business. Easy-to-use, menu-driven program creates and displays maps in 4 different projections: cylindrical, orthographic equatorial, azimuthal equidistant, and general perspective/global. User prompts speed the map-making process. Nearly 9000 built-in, computer coordinates locate land masses and islands anywhere on earth! Make hardcopy hi-res maps with your printer. Plus, the BASIC source code is modifiable so you can use the routines in your own programs.

REQUIRES: Atari BASIC

"New double density disk editor for Indus, Rana, Trak, Astra or Percom drives. . ."

DISK SCANNER— DOUBLE DENSITY

by Mike Fleischmann

Written in machine language

Make quick modifications to disk files. Learn the secrets of disk structure. Get a fighting chance in restoring crashed disks. DISK SCANNER is the most flexible disk sector editor ever published for the Atari. Disassemble sectors using four range options. Modify sectors and edit them on-screen—use its scrolling map for 256 byte sectors. Redefine sector link masks to adjust to any DOS. Scan and print sectors. Trace sector chains. Search sectors by range or chain. Comes pre-configured for single or double density. Enhanced density is supported by an INSTALL utility. Documentation includes a tutorial about disk initialization, variable table of contents (VTOC), directory location and structure. And much more! Added Bonus For Advanced Programmers! Includes a relocatable machine language monitor and a directory sorter.

#AP145 \$19.95

"Design your programs with built-in documentation."

THE [HELP] SYSTEM

by Michael Barall

Written in machine language

Create professional [Help] systems for programs you've written! Create custom arrangement of sub-menus—up to 25 levels! Automatically generate [Help] systems with the "Help Text Compiler" and the "Help Text Viewer". Now you can put those special keys, like the [Help] key to work for you. This program was written by a Stanford mathematician who directed Advanced Operating Systems development at Atari Inc. Makes writing [Help] systems easy. Includes a license which permits [Help] systems to be used in commercial programs.

REQUIRES: Text Editor (such as Word Magic (#AP130))

OPTIONAL: Atari Macro Assembler or OSS MAC/65

#AP136 \$15.95

NEW!

SHERLOCK 1050 Enhanced Density Disk Sector Editor

by Dan Moore and Steve Ahlstrom

Written in machine language

The Atari 1050 disk drive demands new tools for accessing/editing sectors above 720. With SHERLOCK 1050 you can customize any program in your library—and you don't have to be an assembly language programmer. Modify commercial applications programs to take full advantages of your own Atari system. Alter programs to easily access RAMdisks, change title screens, customize menus—anything is possible. Examine or edit any byte in any sector of your enhanced or single density disks (in HEX and ASCII mode). Disassemble (from the disk itself) any machine language file or autoboot disk and learn its secrets! Restore deleted files and salvage broken files with the Trace option. Instantly create a sector map of a DOS 2.5 or 2.0 disk. Quickly search through an entire disk for up to 32-byte strings in either HEX or ASCII format. Send SHERLOCK 1050 output data to your screen or printer. HEX-to-decimal conversion utility is built-in. All at machine language speed, and more! Includes a tutorial for novice disk users.

REQUIRES: Atari 810 or 1050 disk drives

OPTIONAL: Atari-compatible printer

"The ONLY music utility for BASIC programmers!"

ENHANCED POKEY PLAYER

by Craig Chamberlain

Written in BASIC and machine language

Jazz up any program with background music! Experiment instantly—choose from over 50 songs (over 1-1/4 hours of music, including the 1st Movement from Bach's 5th Brandenburg Concerto). Input and edit sheet music under 100% joystick control with the Pokey Editor. Compiled songs are stored as super-compressed BASIC statements. ENTER the song with a BASIC program and, when RUN, it'll play at any tempo in the Vertical Blank Interrupt. Get special effects like phase-shifting, variable attack and decay, percussion, and 8-octave range. Documentation includes a thorough tutorial in electronic music, and how to get the most out of the POKEY chip. A license is included which permits POKEY PLAYER songs to be used in commercial programs.

REQUIRES: Atari BASIC

#AP147 \$15.95

"Highly disk and memory efficient graphic editor designed for BASIC and M/L programmers."

ENHANCED DRAW IT!

by James Burton

Written in machine language

ENHANCED DRAW IT! is a graphics mode 7 paint package plus compression utilities (designed by Ed Churnside of Dragon Quest fame). Let your creativity run wild! Draw free hand with your joystick (status window displays horizontal and vertical position), or automatically draw shapes: circles, boxes and lines. Programmers find ENHANCED DRAW IT! perfect for developing graphics adventure screens. Use the file compression programs to pack dozens of pictures on a disk! Built-in ANIMATOR feature is perfect for art shows/presentations and simple animation experiments. Status window menu info helps you develop precise drawings or any-size custom text. Choose from up to 16 different colors and eight hue levels. Control four color pens, plus two levels of zoom for micro-drawing and close-ups. Then, add your drawings or charts to any BASIC or M/L program! Features auto-fill, page-merging & page-wipe! Store and Explore! Finally, programmers can efficiently use the Atari's most powerful and colorful features!

"The most popular Atari terminal emulator of all time!"

CHAMELEON CRT TERMINAL EMULATOR

VER. 4.03 NEW VERSION

by John Palevich

Written in machine language

Turn your Atari into a variety of computer terminals! Five popular types: Glass TTY, ADM-3A, DEC VT-52, IBM 3031 ASCII, plus a test terminal. Software supports tab, backspace, line feed (on/off), form feed, bell signal, speeds up to 9600 gps, plus lots more. Wide-screen 80 and 132 column emulation. You've never seen anything as fast and smooth as the vertical *and* horizontal fine scrolling. All these features make CHAMELEON flexible enough to use with UNIX operating systems. Perfect for logging on to non-standard systems, such as MCI MAIL and DELPHI, because you can customize *all* terminal parameters. Autodials and stores up to 16 phone numbers. Supports files transfers and features on all Atari 850-interfaces, 835, 1030, and XM301 modems. Version 4.03 includes Columbia University's Kermit file-transfer capability, in addition to total compatibility with the popular Xmodem protocol.

REQUIRES: 48K RAM

***AP113 \$19.95**

Your 6502 Atari can teach you to program the Atari ST!

DEEP BLUE C COMPILER

by John Palevich

Written in C

One of the most transportable languages—Runs on other computers with only minor modifications! Eliminate the tedious hours of assembly language debugging! Faster & more powerful than BASIC. This general purpose language is the "De Facto" standard for the new generation of multi-user "workstation computers" and 68000-based machines like the Atari ST. Pointers, recursive functions, and high-level control structures make complete software systems easy-to-design, implement & maintain.

REQUIRES: 48K RAM, A text editor such as WordMagic/AP130
OPTIONAL: Mathlib for C (AP132)

***AP114 \$19.95**

"Control features previously impossible on any BBS!"

BULLETIN BOARD CONSTRUCTION SET™

Hayes-compatible-version 1.6

by Scott Brause (Delphi ID: RABBIT)

Written in machine language

Get more control over your bulletin board than ever before possible! Use the four BBBS editors, and BBBS will program a custom board for you—*automatically*. Create on-line opinion surveys and hold group elections. Use your board for order taking and start your own business! Change menus and features without having to bring your board down. Perform *all* SYSOP functions from anywhere in the world with *complete* system security. Define up to 26 terminal types to make your board support up to 26 other kinds of computers. Use any hardware configurations: supports ATR8000, Hayes Chronograph, ICD R-TIME cartridge, Axlon RAMDISK, and most Atari DOS's in most densities. Private email includes a message base editor with search and replace functions. Here are some of BBBS's outstanding features:

- 100% machine language, 48K required
- Compatible with ALL Atari computers with 48K or more.
- 65,792 security levels. Each level determines what the user will and will not see, plus decides upon access to a particular area.
- Additional "privilege" levels to allow more flexibility in defining security.
- Xmodem upload/download using Atari and standard CP/M modes. ASCII upload/download also available.
- BBS screen colors are selectable.
- Status window on line 1 to convey important information.
- BBBS may be used with or without passwords.
- System automatically checks for private email upon user log-on.
- Downloadable files may be set up on separate drives, and can be broken up into sections.
- All system editors can be used from a remote location.
- Userlog entries may be marked blacklisted to auto log-off problem users.
- Time each user is allowed on is selectable.
- Users can hit a key in the middle of a menu update, and if it is a valid function it will execute immediately.
- Screen is word wrapped for users.
- Before a download takes place, the system calculates the actual transmission time at the current baud rate and reports it.
- Positively, absolutely, no back doors.
- Supports 300, 1200, 2400 baud modems.

To try out one of the first BBBS boards in the USA, call:
EAST COAST: Scott Brause (JACG board) (201) 549-7591
MIDWEST: ICD BBS (815) 968-2229
WEST COAST: Eric Semel (213) 305-7843.
(log on in ASCII mode)

***AP146 \$24.95**

- Get your BBBS board up and running *instantly* with the *FREE BONUS* sample preconfigured BBS!
- Supports Atari 130XE RAMdisk.
- BBBS is the Official Bulletin Board System of the *Worldwide Users Network*.

Systems & Telecommunications

NEW!

"Intelligent terminal featuring M.C.L.—Macro Command Language. Plus 130XE RAMdisk support. . ."

BACKTALK

by Steve Ahlstrom, Dan Moore and Don Curtis

Written in compiled Action!

Designed for 1986 and beyond. Now, **do more** in less time on BBS's and on-line services. Save money too! Program your Atari PC to dial up lists of other computers or services in the middle of the night and upload or download files. It's a revolutionary concept called "Broadcasting." And BACKTALK has CRC (Cyclic Redundancy Checking) accuracy. Upload/download with three protocols: Xmodem (with or without CRC)—99% flawless transmission, Amodem (Atari BBS version of Xmodem), and Buffer Send/Capture. Supports 300, 1200 **and 2400** baud. ASCII and ATASCII translation—full and half duplex. Use BACKTALK with almost any modem: Atari 850-compatibles, 835, 1030, or XM301. BACKTALK's Pop-Up menu and extra-large buffer will minimize on-line times (especially for 130XE owners!). Ergonomic design. Eye-soothing fine-scrolling text and edit preview window make life more comfortable.

The revolutionary Macro Command Language features these commands:

- wait for any length character string
- control capture buffer (on/off/dump)
- control baud rate switching
- control Xmodem up/download files
- chain macro's with GOTO statements
- error handling (ON ERROR GOTO)
- wait a specified amount of time
- execute macro at a specified time of day
- LOAD new macro library from disk and execute
- joystick activation of last 5 macros

Build an unlimited number of MACRO libraries. Use MACRO titles for easy one-key reference. And Compuserve SIG*Atari members can use BACKTALK to correctly download 99% of CIS's "A-protocol" .BIN files (previously available only with Tscope).

Two years in-the-making, the authors of Paperclip and Synfile+ have done it again. Designed by a SIG*Atari SYSOP, Steve Ahlstrom, exclusively for ANTIC's on-line readers.

Star Raiders was a great game. . . for its time.

XTAL CRYSTAL— AN ADVENTURE IN SPACE

by Dave Reese

Written in machine language

Captain's log, stardate 2284.0. Step onto the bridge of the USS EXCALIBUR SSC-1310—she's the *best* heavy star cruiser in the United Federation's starfleet. Suddenly a Class One distress signal! A planet-threatening Ion Radiation storm has developed in the peaceful Canasian section. Your mission: destroy that storm. You must locate five Photon Crystals to enhance your photon torpedos. Fire the torpedos into the heart of the storm—without getting blown to pieces in the process. *Battle* with Ruskarian fighters, destroyers, and cruisers. *But be careful*—watch out for treaty-breaking

Talosian rebels! *Successfully* complete your mission and you're an inter-planetary *hero*. Fail . . . and you'll be peddling Quirkies at a Gamorian outpost.

The EXCALIBUR comes equipped with impulse and warp drives, transporters, phasers, communicators, shields, quadrant map display, and a spectacular 3D cockpit/navigation viewscreen.

Dock with Starbase Delta-1 when you're low on fuel or need repairs. The docking sequence is visually *stunning* as the EXCALIBUR is grabbed by Delta-1's tractor beam and brought right into the docking bay. Watch technicians work on your ship and then direct you back into space. Detailed colorful special effects are *everywhere* in XTAL—each type of ship looks different, plus 4D Time Warps, science probes, and meteor showers which all contribute to XTAL's remarkable realism.

REQUIRES: 48K RAM, One joystick

Fantasy & Adventure

"Can you make it through all 48 mega-levels and survive?"

KING TUTS TOMB & TOMB CONSTRUCTION SET

by Jeff Wacker

Written in machine language

Explore the corridors of 48 tombs in search of ancient treasure. Watch out for beasts emerging from recessed lairs! Use a musket, land mines, flash bombs and shields for defense. Find the chest of gold, the sarcophagus or other priceless artifacts with the explorer map window. Seven types of beasts—snakes, deadly birds, bugs, bats, dragons, sea serpents, Griffins and curses. Three joystick options—handles up to four players. Five difficulty levels and selectable scenario combinations. Smooth character animation and horizontal scrolling with highly detailed playfields. KING TUTS TOMB combines the best of adventure, arcade and dungeon challenges in four dozen mazes, each 14 screens wide. *Plus*, includes a powerful construction set for custom tomb design.

REQUIRES: One joystick

#AP149 \$15.95

King Tut's Tomb

Tomb Construction Set

"A great graphic adventure game!"

DRAGON QUEST OR A TWIST IN THE TAIL

by Ed Churnside

Written in BASIC and machine language

You're in a colorful, magical fantasy land. You must slay the fire-breathing dragon to save the kingdom. Clues are hidden in the screen pictures and text. Look closely at where you are and where you're going. Retracing your steps can be difficult! Don't get killed. Watch out for evil hazards. Carry on the quest. Find the dragon! Games can be saved to disk at anytime during play. Fast and fantastical—for adventure gamers only!

REQUIRES: Atari BASIC

#AP139 \$15.95

GALAHAD AND THE HOLY GRAIL

by Douglas Crockford

Written in Machine Language

Carry on the sacred quest! Find the miraculous Grail! You're a knight of the legendary Round Table. Travel forests, meadows, roads, and castles with secret passages. Use the magic ring for protection against the fire-breathing dragon and other perils. Play alone or with 2 or more players. Return the Holy Grail to Camelot and win. Nearly a hundred rooms to search!

Crockford is now with Lucasfilm's Games Group—he's done it again!

REQUIRES: One Joystick

#AP110 \$15.95

ATARIORACLE

A Compu-Spiritual Advisor

by Stephen Wagner

Written in BASIC

Quiet the room . . . dim the lights . . . and concentrate. Feel the eerie vibrations that permeate the atmosphere as you ask the all-knowing AtariOracle your questions. Ask it about anything: your love life, friends, finances, your future. The AtariOracle's ghostly hand will spell out its startlingly prophetic answers. All questions and answers can be outputted to your printer for a record of your "session." Includes an Answer Editor that allows you to customize the answers (amaze your friends with intimate details). This one will haunt you!

REQUIRES: Atari BASIC

#AP138 \$15.95

APX CLASSICS FROM ANTIC

Fantasy & Adventure

DANDY DUNGEON

by John Palevich

Written in machine language

A unique dungeon adventure/construction set for up to 4 players. You're armed only with a bow and arrows and your wits. Get past the monsters! Collect treasure, magical smart bombs and maze keys as you travel through 26 levels! Easy keystroke commands let you create your own multi-screen scrolling playfields. Print out your new levels on paper with any printer. The secret tactic is cooperation among the players in the DANDY DUNGEON.

REQUIRES: One Joystick per player #AP116 \$15.95

APX CLASSICS FROM ANTIC

Maze Chasers

LORD OF THE ORB

by Jose Suarez

Written in machine language

The old magician asks you to recover the Orb. "Return happiness to our land. . .", he begs. Accept the challenge: Recover the 9 treasures! Armed only with a magical cloak and "glowing" arrows you must search through many levels of the warlock's castle for the Living Orb of Fortune. HINT: Elude the forces of evil & build your strength from gold and diamonds you pick up as you scroll through the castle. Brilliant animation and graphics and fast joystick action make gameplay intense.

REQUIRES: One Joystick

#AP103 \$15.95

TAXICAB HILL

by Bill Morris

Written in machine language

The Game's object: Drive your cab to one of the 4 phones. Receive a call. Pick up your passenger. You score a cab fare! WATCH OUT! Other cabs can steal your fare. Don't have a traffic accident or you'll lose one of your cabs!

Answer the phones! Get the passengers! Three different "neighborhood" play screens: Residential, Warehouse, and High Rise. Scores are displayed in the window of the Taxi Garage. Includes: unique hi-res, 16-bit (4-voice), collection of background blues toons, never heard on any Atari game. Have fun on the Streets of San Francisco—written by an S.F. cabbie!

REQUIRES: One joystick

#AP137 \$15.95

BUMPOMOV'S DOGS

by Gray Chang

Written in machine language

From the author of DOG DAZE DELUXE, here's BUMPOMOV'S DOGS! Collect dog biscuits scattered through the maze! Store them up in your doghouse to win! Defend yourself by capturing and throwing a floating bone at your opponent (try and master the "wall-hugging bone" throw). Hit your opponent and he'll drop his stash of biscuits. Or try to steal his biscuits when the "Reward Square" appears. Colorful "splitting & scrolling graphics" let both players follow all the action in this huge multi-screen scrolling doghouse. Collect 100 biscuits to win!

REQUIRES: One joystick per person

#AP112 on-sale \$12.95—was \$15.95

APX CLASSICS FROM ANTIC

Shoot 'em Ups

RAID ON GRAVITRON

by Jim Sommers

Written in machine language

Lead the raid on the alien stockpile, Gravitron! Find the secret base in a black hole Space-Time Tunnel! Pilot your StarCruiser from the Captain's seat! Give all flight orders with your joystick! Defend yourself with a Plasma Meson Cutter against alien squadrons armed with Gravitron torpedoes. Choose a 1 level training mission or a Combat mission with unlimited number of tougher levels. Check your energy timer—avoid a Plasma Meltdown! Navigate booby-trapped time tunnels to save your space colonies!

REQUIRES: One Joystick

#AP121 \$12.95

"... a classic, 2-player galactic shoot-out."

SPACE WAR

by Jay R. Jeager

Written in machine language

Pilot your personal starfighter to save the solar system! Watch out for the enemy photon torpedoes! Return photon torpedo fire—Score a direct hit to destroy the enemy! Use the sun's mysterious gravitational waves to propel your starfighter. BE CAREFUL! Don't become a prisoner of the sun's gravity & and a "sitting duck" for enemy forces! An advanced arcade thriller for one or two players.

REQUIRES: One joystick per player

#AP101 on-sale \$12.95—was \$15.95

PHOBOS

by Greg Christensen

Written in machine language

The Challenge: Travel to the core of the planet PHOBOS. Destroy the enemy control center buried deep within! Plummet through caverns—picking up fuel & knocking out missile defenses. Quick! Steer past the narrowing walls & through the compound laser gates—and DON'T blast the ammo dumps! There's 16 different levels of planetary defense built-into PHOBOS! Choose from 4 skill levels: novice to commander. Game display includes: fuel gauge, current cavern number, score & session high score.

REQUIRES: One joystick controller

#AP119 \$15.95

"A Cavern of Mars sequel!"

MARS MISSION II

by Greg Christensen

Written in machine language

Your Galactic Mission: Fly your space shuttle to destroy the Martian base. Get the Solar Command Ambassador out of there without harm. WATCH OUT! As you cruise over dangerous terrain, the Martians launch missiles at you! Get through the 5 sectors of Mars: Picking up fuel & knocking out missiles, Fly past the floating minefields of Chron, Streak thru the Martian suburbs, then to Canalus, the underground mazes & onward—to destroy the alien base! From the most successful APX programmer—the author of Caverns of Mars!

REQUIRES: One joystick Controller

THE PAPIE DISKS

Climb into the hacker's attic and discover the arcane secrets of Atari professional programmers!

In the early days of Atari, top professional freelance programmers banded together to trade their secrets.

Organized by the prolific Jerry White, the group called itself the Professional Atari Programmer's Information Exchange (PAPIE).

The PAPIE roster reads like a Who's Who of Atari programmers. A sampling includes Russ Wetmore, author of "Preppie I & II," Clinton Parker, creator of ACTION!, Jim Nangano, "Flip & Flop" and "Spy vs Spy," and Sheldon Leemon, creator of "Instedit."

Each member contributed their own private programming utilities and favorite programs, which were compiled on disk by Jerry White under the contributor's name and program number (i.e. Wetmore's 3rd program would be WETMORE3). Some of these professionals are now willing to share them with Antic's readers, so we are offering them as a kind of "hacker's delight."

Most PAPIE programs are utilities that help solve advanced programming problems. And there are a good deal of assembly language routines intended to be incorporated into larger programs. In some cases there is documentation, but mostly there is none. Get the whole set and explore how the pros program!

EACH DISK IS GUARANTEED TO BE MORE THAN 95% PACKED!

Disk #1:

Marc Benloff, Sheldon Leemon, Russ Wetmore, Jerry White

Over 40 files—highlights:

BENIOFF 1: Fancy Writer font printer

BENIOFF 2: Moves a character in ML

LEEMON 3: Screen dump and load to disk by direct CIO call

LEEMON 4: SPYRO-GRAPH with array for SIN and COS (mode 7.5)

WETMORE2: Object to string converter

WETMORE3: NEXT STEP "DATA" code to assemble file

WHITE 2: Relocates sections of RAM

WHITE 7: Fixes DOS for burst I/O

WHITE 4: Color table animation w/GTIA color registers

WHITE 5: AUTORUN.SYS creator for specific purposes

WHITE 8: Menu to LOAD (and RUN) binary load object files

WHITE 9: Disk foot to printer utility

050 free sectors
#IE301 \$12.95

Disk #2:

Matt Loveless, Clint Parker, Fred Tedsen, Russ Wetmore, Jerry White

WORKS-IN-PROGRESS: Many related source, data, and object files for an unfinished centipede game by Matt Loveless, plus:

LOVELES 1: 14 related files

PARKER 4: ML storage program

TEDESEN 1: ML 16-bit sound routine (source and object)

WETMORE: Files 4 through seven contain Russ's general purpose music interpreter (source and object code for each)

WHITE 12: Disk directory print routine

019 free sectors
#IE302 \$12.95

Disk #3:

Jim Nangano, Carlos Reyes, Russ Wetmore, Jerry White, John Weber

25 advanced utilities—highlights:

NANGANO4: converts a RAM data file into AMAC's DB statements

NANGANO5: converts a PRN file into equates

REYES 1: BASIC version of Quick Menu Maker II (source code for ML version also)

REYES 4: loads in an object file and converts it to a data statement or string

REYES 5: allows editing of binary headers in ML files

WETMORE14: modified version of Amodem 4 terminal handler

WETMORE15: modified AUTORUN.SYS for RAM-DISK users

WETMORE16: modified DUESYS for use with WETMORE15

WHITE 28: document file loader and printer

WHITE 30: allows user to modify the color of a Graphic I character

030 free sectors
#IE306 \$12.95

Disk #3:

Sheldon Leemon, Fred Tedsen, Clint Parker, Russ Wetmore, Jerry White, John Weber

20 Machine Language Files—highlights:

LEEMON 6: ML calls for ANTIC modes 4 & 5

TEDESEN 2: autrun menu for ML programs

TEDESEN 3: graphic mode 8 character plotter in assembly source code and in BASIC

TEDESEN 4: title card builder

PARKER 5: snagging visual display from Action!'s author.

WETMORE10: SUPRCOPY, a burst I/O disk copy utility (source and object code)

WETMORE9: the music from PREFFIE

WETMORE8: macro files library

WHITE 14: S2FONT upgraded version

WHITE 15: disk font to string converter, modified from Wetmore

004 free sectors
#IE303 \$12.95

Disk #4:

Sheldon Leemon, Matt Loveless, Stuart Smith, Fred Tedsen, Russ Wetmore, Jerry White

32 Files—highlights

LEEMON 7: resets character with no overhead

PARKER 6: SmartModem dialer

LOVELES 3: boot disk for SECs sectors

SMITH 1: music player program

TEDESEN 5: packing algorithms, for compressed picture files (series of 10 source and object files)

WETMORE11: how to access the RS232 port from ML

WHITE 19: removes REM statements from BASIC programs

009 free sectors
#IE304 \$12.95

Disk #7:

100% Clint Parker Action! Utilities

28 ACTION! utilities written by ACTION!'s author, Clint Parker—highlights:

BLKIC : reads size bytes from dev. I/O address—returns # of bytes read

FADEACT : amazing "Star Wars"-like text fadeout demo.

PARKER 1: object file to BASIC converter

PARKER 2: number to string subroutine

PARKER 4: storage utility

PARKER 9: library setup for P/M graphics

SCRDEMO: screen demo program showing moving character

TIME : displays a real time clock

PARKER10: disk I/O routines

PARKER 11: adds a new command to the editor

PARKER12: demo about Readblock and Writeblock

PARKER13: half-finished terminal program

PARKER15: updated MOVBLK routine for Action!

030 free sectors
#IE307 \$12.95

Disk #5:

Marc Benloff, Sheldon Leemon, Matt Loveless, Jim Nangano, Clint Parker, Stuart Smith, Fred Tedsen, Jerry White

Including Jerry White's Atari Memory Map—highlights:

BENIOFF 3: breaks down string to BYTE statements for FOKING to screen

LEEMON 9: joystick player movement using PRINT statements

LOVELES 6: allows color manipulation of screen without DMA

NANGANO1: Extended BASIC

NANGANO2: printer patch for AMAC to produce correct form feeds

NANGANO3: patch to MEDIT to eliminate need to delete backup file

PARKER 7: DLI routine for LOGO

SMITH 4: maze game

SMITH 5: sector/memory copier

TEDESEN 7: description of Advanced Music System files

WHITE 25: ATARI MEMORY MAP

008 free sectors
#IE305 \$12.95

Disk #8:

Jim Nangano, Carlos Reyes, Fred Tedsen, John Weber, Jerry White

Including MAC65 routines plus more ML source code—highlights

REYES 7: new revised version of Quick Menu Maker II

REYES 8: macro library in tokenized form ready to be used in a MAC65 program (series of 4 files)

TEDESEN 9: BASIC version of P/M editor, with documentation

TEDESEN10: ML version of P/M editor

WEBER 2: utility to fine scroll both vertically and horizontally (source and object)

WHITE 30: displays and optionally prints all doc files

002 free sectors

ANTIC PUBLIC DOMAIN LIBRARY

Discover the work of those committed Atarians who unselfishly create programs for everyone to share. During the last three years, Antic has seen the best (and the worst) of it all. We're picky. Our original Library, introduced in 1982, listed 16 disks. It has grown over 300% in the past twelve months. Our next goal is 100 disks or 1,000 programs (whichever comes first).

During the past three years, this family of talented programmers loved the Atari and wrote prolifically for the machine. After all, a challenge is a challenge, right? There was Stan Ockers, who wrote Chicken (Antic's very first game). And some true devotees, like Len Dorfman, who never accepted money for anything he wrote. The works of these talented people, the PAPIE programmers, and others, have inspired many enthusiasts to create exceptional programs.

What's in store for the future? As well as our commitment to the current line of 8-bit software, there is now the Atari ST. Antic is going to release ALL the early ST Public Domain software as it's written. In fact, the leaders in the 68000 world will probably be the next generation's software success stories.

THE USER GROUP/BBS CHALLENGE

You may have Public Domain software to contribute to our Library. Let us know if you do. **THE CHALLENGE:** Any user group librarian or BBS SYSOP who can produce a disk that is good enough for the Antic PD Library will get their groups name or BBS phone # in that program's title. (Rules: No programs can be duplicates of anything currently published here, and nothing can be copyrighted by any publisher or individual.)

—The Customer Service Dept.

All programs in this series sold as is. There's almost no documentation included, except what's built into the programs themselves (besides the exceptions noted here in this catalog). Therefore, you may need some expertise in order to use the products properly. Because this is Public Domain software, not Antic's, the Arcade Customer Service Dept. cannot provide the same type of service as for programs we publish ourselves. (i.e., Antic Magazine type-in listings, APX Classics, and programs from other internal sources.) There may be some programming quirks you'll need to modify for your individual hardware system (read the descriptions carefully). However, all programs have been tested at Antic and will perform. Due to unforeseen circumstances, contents may vary slightly from the descriptions here.

520 ST

STERM PLUS SOURCE

Get on-line and transfer files with STERM, a full-featured terminal program written in 68000 assembly language. STERM features Xmodem, capture/send, 300/1200/2400 baud support (and more, up to 19K baud), on-line help and buffer status info. **ALL SOURCE CODE IS INCLUDED**, in addition to object

code. STERM is designed for successful Xmodem transfers under difficult conditions and will work with CompuServe from foreign countries. This disk also includes several C source and object graphic examples, plus five LOGO demos.

#PD057 \$12.00

ST DOODLE: PD paint program written in compiled C, including *all* source and batch files for you to explore. Ask our telephone operators for availability date.

#PD058 \$12.00

TELECOMMUNICATIONS

NEW! CENTEX 7.83 ATARI TERMINAL

The most full-featured Public Domain telecommunications program available, rivaling most of the other commercially available terminal programs. A must addition to any user group PD library or BBS! Features: joystick input, auto log-on macros, adjustable delay rate, SPRINT & MCI code support, am/pm clock, on-line timer, adjustable margins, colors, and luminances, on-line help menu, auto-dial database (with name and comments fields—limited only by disk space), auto-redial, 300/1200 bps, unlimited file capture, Xmodem and buffer up/download, answer or originate commands, built-in disk utilities package, and more! Pre-configured to support Atari 850-interface modems (Hayes-compatibles, Volksmodem, etc.), and will support 1030 and XM301 if you add *your own* R: handler (available in CompuServe's SIG*Atari DL2) and the MPP if you *have* the Smartmodem emulator (available from MPP). DOS2.5/130XE users can configure CENTEX to access the 130's RAMdisk. Try it, you'll like it!

#PD059 \$10.00

Kermit Terminal Emulator

Now your Atari 800 can talk to the new Atari ST's, IBM PC's, and many other minis and micros. Kermit gives you more control over transferring files than any other terminal program. Invented at Columbia University, this version was written by John Palevich (the author of APX's Chameleon). Comes ready-to-run, with complete documentation. Supports Hayes compatible (850 interface) modems.

#PD038 \$10.00

HomePak Customizer Disk

If you own HomePak, this disk will allow you to change dozens of parameters: new character sets (includes one new example charset), key repeat rate and bell toggle, auto line-feeds on/off (essential for MCI mail and Delphi). Learn about the custom macros. Special handlers for MPP modem, ATR-8000, and R-Verter owners. Including a new DOS 2.5 patch, plus 130XE owners can use the RAMdisk patch to access their extra 64K.

#PD041 \$10.00

ANTIC 850 TELECOMMUNICATIONS

Telecom code Galore! Get the super new AMODEM complete w/phone directory and autodialer. Use TSCOPE for CompuServe SIG*Atari downloading & on-line graphics. Plus DISK-O-LINK, a Mac-like, experimental bit-mapped terminal written in C. (This version is for 850 interface w/Hayes-compatible modems.)

#PD024 \$10.00

VT100 Terminal Emulator

How would you like an 80-column terminal program without needing any special hardware? This will turn your Atari into a DEC-compatible VT100 graphics terminal. Supports: Hayes compatible (850 interface and R-Verter), Atari 835 and 1030, and MPP1000 modems. Access on-line VAX graphics. Use with any DEC minicomputer, including Delphi and CompuServe. Ready-to-run, complete documentation included (requires Fix XL and a monitor)

#PD037 \$10.00

ANTIC 1030 TELECOMMUNICATIONS

NEW! Now including TERM1030 ver. 3.0 w/unlimited file-size downloading plus autodialing directory. Also includes TSCOPE and DISKLINK.

#PD025 \$10.00

AUTODIALER TELEPHONE DATABASE

Hayes-compatible machine language telephone database dials 100 different phone numbers. Also dials codes for most long-distance carriers such as Sprint, MCI and ITT. Communicate faster. Prints standard form-fed labels. (850 interface required)

#PD036 \$10.00

MSCOPE MPP CompuServe Terminal Emulator

MSCOPE is a special version of TSCOPE just for the MPP1000 series of modems (written by Joe Miller). This is the *only* way to view CompuServe's on-line graphics. MPP owners will appreciate 100% error-free downloading from the SIG*Atari (finally!). Comes ready-to-run, with complete documentation.

#PD040 \$10.00

PROGRAMMER'S TOOLKIT

SUPER UTILITIES #1

Lots of utility for low bucks! Includes: MICROASSEMBLER with USR ROUTINES & ASSEMBLER. A disc documentor, DOC. Do automatic line number with NUM! Connect parallel printer to ports 3 & 4 with PRINTNOP. MEMTEST, memory tester.

#PD010 \$10.00

SUPER UTILITIES #2

"Utility software For Everyone!"

MODEM, Telecommunications software. HOME INVENTORY tracks your belongings, TYPO, the original Antic listing proofreader. BUBBLE SORT, a E-Z data controller. RENUMBER, make BASIC line number changes simple. Plus, COMPARE, a listings difference checker.

#PD011 \$10.00

SUPER UTILITIES #3

All for a price you'll love. TINY TEXT, a word-processor. GTIA TEXT WINDOW. LABEL PRINTER, RT CLOCK, add real-time to your system, plus DISASSEMBLER, offers M/L analysis.

#PD012 \$10.00

ESSENTIAL UTILITIES (+Epson Aids)

18 utilities, featuring 5 for Epson MX and FX owners. Including EPSONTYPIST—turn your Epson into a typewriter. SYSTAT—Atari system status monitor. PROTECT scrambles BASIC programs. AUTOTYPE converts USR code into BASIC strings. Plus 14 more!

#PD046 \$10.00

PROGRAMMER'S TOOLKIT

ArtDOS

If you use microscreen graphics or special character sets in your programs, ArtDOS will load them to your screen directly from DOS—no graphics program is required. New DUP.SYS menu options include Load Micropainter file, Load Microillustrator file, Load or Display Character Set, Make AUTORUN.SYS, and Read Text File. One-key commands speed things up. This disk includes 10 picture files, plus 20 new character sets, which you can use with any program you write. Make your programs more professional looking.

#PD043 \$10.00

Antic FORTH

Here's a double-sided disk that includes: Powerful FIG-forth Language, an EDITOR, plus ON-DISK TUTORIAL (tutorial requires FixXL). Lowest priced FORTH ever!

#PD020 \$10.00

ACTION! UTILITIES #1 (Graphics-oriented)

16 Action! programs, including: 4 Epson screen & character dump routines. Superfast GTIA screen loader. Display list example. Internal DUP.SYS written in Action! Plus 5 graphics demo's and more.

#PD054 \$10.00

PROGRAMMER'S DESIGN TOOLS

Redefine any mode character set with FONTEDIT, the best PD font editor ever written. Use with PMDESGNR, a self-modifying P/M graphics program

builder. Create computer graphics with SKETCH, a powerful paint tool. Experiment with POKEY chip with SOUNDLAB. DATABASE is a general purpose file management system. Plus a lot more!

#PD048 \$10.00

ACTION! UTILITIES #2 (Mach. Lang-oriented)

ASSEMBLR—machine language assembler, works with Action! monitor (plus docs). DISSASEM—disassemble ML programs in Action!. RAMSORT—hi performance in-RAM sort utility (plus docs). DOS3TO2—conversion utility to convert DOS 3 to DOS 2 files. RELOCBIN—generates a self-relocating binary load file (plus docs). BINMENU—beautiful binary load menu with rainbow background and Action! logo.

#PD055 \$10.00

DATABASE MANAGERS & DISK UTILITIES

SUPRINDX & DISKDIR, two of the most popular user group disk directory database's. SECTCHEK—simple sector checking utility. CALENDAR—prints monthly calendar anytime this century. QUIKSORT—learn to sort faster in BASIC. Includes SUPERDUP.SYS, a new DUP.SYS with built-in everything! 14 free sectors on this packed disk!

#PD047 \$10.00

The Fix XL (PD Translator)

Stop hunting for the Translator! Here it is! Better than the factory original. FIX XL is the easiest, most powerful translation software around! FIX XL Disk contains entire compatible 400/800 OS so XL/XE owners can run ALL Atari software.

#PD026 \$10.00

LEARNING LABORATORY

NEW!

C.U.E.S. EDPACK #2

The FUNCTION Machine, generates any math functions. Create a custom Spelling Bee with SPELLBEE, AMERICAS—interactive N. & S. America lesson. METRICS—metric system tutorial. MATHPKG—find: G.C.D., Prime factors, Linear interpolation, quadratic roots, simultaneous equations, and more! Plus four bonus programs!

#PD045 \$10.00

COMPUTER TUTOR

"Ideal For Youngsters..."

Eight learning-games: BARNYARD, a mystery, MATHWARS for Arithmetic action. Test general knowledge with CONCENTRATION. Work on your French with translation flashcards in FRENCH GAME. QUIZ: a giant, multi-purpose, test program. Get the educational advantage!

#PD023 \$10.00

BUSINESS & FINANCE

More than 14 programs! BANK BALANCE, Get the correct balance! IRA, for retirement fund accounting. BUSINESS, great menu-driven integrated software. BARGRAPH, for presentation graphics, SINK-FUNDS, a sinking fund tracker, plus 9 more titles! Worth much more.

#PD022 \$10.00

NEW!

RADIO & ELECTRONICS (JACE)

Ever wondered how Morse Code works? How to predict satellite orbits? What Ohm's law is all about? Well, the JACE people have done it again. Includes programs to teach all the above, plus a YAGI antenna designer, three

resistor design and decoder programs, and an LC-circuit value computer. HAM utilities include a call record program and a routine to put a clock and call-letter log on-screen. All programs are easy to understand and to modify for your individual needs.

#PD064 \$10.00

SAN MATEO COMPUTER— USING EDUCATORS SOCIETY (C.U.E.S.) TEACHERS USING ATARI'S—OFFICIAL EDUCATION PACKAGES

NEW!

C.U.E.S. EDPACK #1

Six mathematics games, including, +, -, *, /, guessing games, roman numeral tutorial, and drill & practice lessons. Hi-res geometry and algebra equation plotters. International geography game plus two USA states and capitals lessons. Plus, an English and French version of HANGMAN!

#PD044 \$10.00

NEW!

ASTRONOMY & METEOROLOGY (JACE)

The Jacksonville Atari Computer Enthusiasts (JACE) have an unusually diverse collection of Public Domain software. This is definitely the best PD collection for amateur astronomers. Includes an observation simulator for tracking objects in our solar system; Comet Halley coordinate generator; a hurricane locator/tracker; a planetarium simulation that plots constellations and star points; a planet tracker for calculating the exact position of planets at different times of the year; and a weather forecaster which uses your barometric readings and time input to predict conditions wherever you live. All this on one disk!

#PD063 \$10.00

CREATIVE ARTS & ENTERTAINMENT

PD MICROPAINT ARTIST

(A.C.A.O.C.)—BBS:
714-731-6523

Greg Tavares of the Atari Computer Assoc. of Orange County, CA has written a machine-language clone of the most popular Atari graphics program ever. Includes every feature from the original, plus some new ones: Draw, Elastic, Zoom, Fill, and Halt Fill modes. An unlimited number of colors and patterns are available. Use the mini-DOS for file handling. Follow the guidelines in the documentation to include files in your BASIC programs. **BONUS!** Get started with eight micro-screen pictures culled from the Antic Archives.

#PD053 \$10.00

Atari Mini-Film Festival (or "Reel Time Animation")

See the amazing computer animation capabilities of your Atari! This disk contains eight films, all made with Moviemaker by artists from all over. See the fabulous Dancing Robots, Swarming Birds, Charlie Chaplin, and lots more (including Antic's 1984 New Year's Juggler). The disk has a machine language Moviemaker autoplacer on it; you don't need to own the program to enjoy these incredible animations.

#PD042 \$10.00

ATARI SPEAKS HUMAN

Ever wonder if your Atari could digitally sample a human voice? As well as an ordinary tape recorder? It can. NACHRIC and VANHALEN are two mind-blowing digitized human voice experiments. Put David Lee Roth inside your Atari! (Hint: NACHRIC is an eerie hello in German from our Atari friends overseas—crystal clear!)

#PD052 \$10.00

CROCKFORD'S WHIMSEY

"Great special effects!"

Douglas Crockford, (creator of GALAHAD & THE HOLY GRAIL, BURGERS) is now at Lucasfilm. Here's some of Doug's new whimsey: Mind-boggling simulations of a super-real 3D DANCING BALL, a terrific, musical EAR TRAINING DRILL, plus an awesome endless 3-D maze where you search for the musical passages.

#PD033 \$10.00

PHOTO GRAPHICS

Outstanding! A colorful collection of an entire disk full of excellent high-resolution digitized photos.

#PD017 \$10.00

130XE AUTO ARTSHOW

If you own a 130XE, this disk has a lot to offer. Of course, it has sixteen great pictures on it (including one of Jack Tramiel himself). But it also loads all of them into the extra 64K at once, and then displays them by page-flipping from one to the other. What's more, the short program that does this is in LISTable BASIC form, and you can study it and modify it to load your own compressed Microillustrator files. Learn more about the fantastic 130XE computer! Free Bonus! Includes DOS 2.5 for folks who haven't been able to get it from a local user group, BBS, or Compuserve.

#PD065 \$10.00

SOUND & GRAPHICS

A whole disk of Music and Drawing application programs—For programming, school, home use: BABY PRO SOUND, TUNE RITE, ETCH SKETCH, and more!

#PD016 \$10.00

GRAPHICS GALORE

A super disk of demonstration graphics: ATARI RAINBOW LOGO, SPIRAL, SPIDER COLORING PROGRAM, and much more! Amaze your friends!

#PD015 \$10.00

MUSICAL HITS

Enjoy scores from your favorite films and TV shows: STAR WARS & other famous themes—M.A.S.H., Happy Days, Young and The Restless, and more! Does NOT require Music Composer cartridge.

#PD014 \$10.00

NEW! HEAVY METAL ART (JACE)

Turn your Atari on to '80s-style heavy metal computer art! Includes Alfred Gomez's prize-winning entry in Antic's color-the-cover contest, Vampire Girls from Venus, Valkyrie D'N'D Heroess, Space Dock scene simulation, and more! All pictures display more than 30 colors at once, and some use over 100 colors for beautiful shading effects.

STRATEGY & ADVENTURE GAMES

NEW!

TACTICS AND WITS

Full of puzzles and conundrums. Stretch your mind! QUBIC—3D tic-tac-toe; CIVIL WAR—wargame text simulation; WSPUZZLE & WORDHUNT—two wordgame brain teasers; HAMURABI—govern ancient Sumeria; RICOCHET—fire shots into the grid to discover who's hiding where; BLOCKED—worms-like graphic strategy; and more!
#PD061 \$10.00

LITERARY FANTASY

Boot up strategy with 4 BIG text adventures. DEATH WORLD—Go on a quest to find the only other survivor of Alpha II. MAD HOUSE—SODA FOUNTAIN RAG, SUMMERTIME, LUSH LIFE, and 4 others to set those fingers snappin'!
#PD056 \$10.00

ANTIC STRATEGY DISK #1

Full of strategy classics! Includes: BLACKJACK SIMULATION, DEATHSTAR, a sci-fi action game, WUMPUS, a text adventure, CIVIL WAR, a strategy game, and ARTILLERY.
#PD002 \$10.00

TALES OF ADVENTURE

Four new all-text adventures. Ideal for fantasy & puzzle freaks! A great value in games! Solve a jungle mystery. Go on a deadly treasure hunt! Sail the seas as the captain of a doomed ocean liner . . . or wake up as a super-human monster!
#PD032 \$10.00

OCKERS & ADVENTURE

Two of Stan Ockers best: VULTURES and CASTLE HEXAGON. The rest of the disk is a large scale text adventure that you can play or modify to create your own games—Get creative!
#PD004 \$10.00

BIG GAME DUO

Two BIG games that fill an entire disk. HERBIE has 4 levels of screen action. SMOKIE is a role-playing simulation with text plus great graphics. Derived from a well-known movie!
#PD007 \$10.00

NEW!

STRATEGISTS ENCOUNTER

Nine classic strategy games on one disk! Includes QUIX—machine-language PD version; CLUE, where you must discover the murderer; OILWELL—oil-drilling game simulation; STRATEGY—computer version of STRatego; DIMEN23—3D maze game; TAG—try to tag the other player; BIRTHDAY—a birthday card program complete with words, music and cake that you can customize for your friends; and two more!
#PD062 \$10.00

FANTASY VENTURES

Features sophisticated simulation games and text adventures. Seven top games including: TITAN, HORSE-RACE, DUNGEON, TIGER and HURRICANE.
#PD027 \$10.00

ANTIC PIX MACHINE LANGUAGE GAMES

STELLAR TRIO

ORBIT: 48K orbital simulator. Try to dock with an orbiting space station while dealing with strong gravitational forces. Threatening asteroids can be blasted with missiles. Exceptional astrophysics simulation.

DEFENSE: Defender clone with a unique Death-Ray twist. Very fast. Voted BEST USER GROUP SHOOT-EM-UP at Antic.
#PD018 \$10.00

GAUNTLET: 48K planetary attack game featuring 50 screens, 17 types of smart enemy ships with 10 types of offensive weapons. Use fusion bolts, flares, homing missiles and napalm-like TRIDEX to get to the Kingship and win. 3 difficulty levels. 10 game play options.

STRATEGIC QUARTET

BACKTRAK—Find the shortest way through the PAC-MAN-like screens and watch out for the bird!

LIFASET—Game of Life Construction Set with more variables than inventor/scientist John Horton Conway could have dreamt of!
#PD019 \$10.00

SKULLS

SKULLS—Pits two players against each other with "deadly" results. Fun and very furious.

BEAMTRON—Another two-player test of logic. Use the deflector-building tool kit and build Beam Paths to destroy your adversary's weapon! The Russian Roulette of Atari games.

GAMES OF SKILL & ACTION

GAME TREASURY

A super games value. 13 hot new public domain games. Puzzle games: BOGGLER, CUBES, and TIC 1. Plus PIN-BALL, DARK TOWER, METEOR, OUTPOST, WAR, plus 7 more!
